

► **DR System with One-stop Image Acquisition Station**

XQ18RP

- 1.8kW Output power
- 40-90kV, 2-40mA, 0.1-20mAs
- 0.8mm Focal spot
- Working frequency up to 600kHz
- 9kg Net weight

Flat Panel Detector (Wireless)

- Scintillator: CsI
- Active area: 14×17 inch
- Spatial Resolution: 3.6 LP/mm
- Pixel Pitch: 139 μ m

YOLONG

ADVANCED & SUPERLIGHT VETERINARY PORTABLE X-RAY MACHINE

XQ18RP

UHF & Battery-powered Portable X-ray

XQ18RP adopts compact and lightweight design, to output outstanding and high-quality imaging. It is ideal for veterinary applications, especially for horses. With a durable and powerful battery, it can provide 300 exposures per charge. Easy to carry and use wherever and whenever you need it.

► Features:

- Power adaptability 100~240V
- Rechargeable & detachable battery
- Powerful output in 90kV, 40mA
- 300 shots after full charging
- 32 preset values applied for 8 body parts of 4 body types

Laser ranging for precise data

Collimator controller with one hand

Sturdy & lightweight to carry

Ergonomic panel
for easy operation

Customized services for your choices

One hand holding makes diagnosis easier

Battery powered—Free from interconnecting cables

Higher quality images with lower X-ray dose
